

CruiseControl.NET - Bug # 354: Error trying to open Settings menù

Status:	New	Priority:	Normal
Author:	Paolo Libardi	Category:	
Created:	02/27/2015	Assignee:	
Updated:	02/27/2015	Due date:	
Affected version:	1.8.5		
Description:	<p>I had CCTray configured with IP address of our continuous building server. Then we changed ip and dns on our LAN. I unchecked all projects with previous server IP. I added all projects with server name, ip is now assigned with dhcp. I rebooted my laptop, and now CCTray opens empty and if I try File Settings I get following error message. Error message says "Reference to an object not set on an instance of object."</p> <p>Any hint on how to solve this issue?</p> <p>-----</p> <p>-----</p> <p>Unhandled exception: System.NullReferenceException: Riferimento a un oggetto non impostato su un'istanza di oggetto.</p> <p>in ThoughtWorks.CruiseControl.CCTrayLib.Presentation.MainForm.ReloadConfiguration(Func`1 loadPreferences)</p> <p>in System.Windows.Forms.MenuItem.OnClick(EventArgs e)</p> <p>in System.Windows.Forms.Command.Invoke()</p> <p>in System.Windows.Forms.Control.WmCommand(Message& m)</p> <p>in System.Windows.Forms.Control.WndProc(Message& m)</p> <p>in ThoughtWorks.CruiseControl.CCTrayLib.Presentation.MainForm.WndProc(Message& m)</p> <p>in System.Windows.Forms.Control.ControlNativeWindow.WndProc(Message& m)</p> <p>in System.Windows.Forms.NativeWindow.Callback(IntPtr hWnd, Int32 msg, IntPtr wparam, IntPtr lparam)</p> <p>-----</p> <p>OK</p> <p>-----</p>
